Youth Coding

powered by ThoughtSTEM

FUN

We use proprietary software we've developed to turn games like Minecraft into fun code learning experiences.

Your child will love to learn!

CREATIVE

Students exercise their creative side in our classes!

We believe coding is all about expressing yourself and sharing your creations with others.

PROBLEM SOLVING

We challenge every student to build code creatively!

Our curriculum was designed to cultivate problem solving and dynamic learning.

• • • Minecraft Modding at Longfellow K-8

Students can develop their skills and passion for computer programming while enjoying their favorite video game, Minecraft! Our experienced teachers will coach and challenge your student in the art of Minecraft modding.

Plus, get a 1 year free subscription to our proprietary Minecraft modding software so your student can share their mod creations with friends outside of class!

Room 16 at Longfellow K-8 • • •

Mondays, 3:40pm - 4:40pm
